

What is it?

AFCNI engineers will test the existing emergency lighting in your premises and can advise on and supply BS5266 compliant emergency lighting products and services.

Why do I need it?

In the event of fire, it is essential that the safest and quickest routes to exit are displayed. Our engineers can help you to position your signs correctly and ensure that they work on battery power in an emergency.

What is the legal requirement?

As an employer you are responsible to identify all exits using high visibility signage, these signs must be clearly visible from anywhere in the workplace. Fire and Rescue (Northern Ireland) Order 2006 and Fire Safety Regulations (Northern Ireland) 2010.

Who does it apply to?

All commercial environments and where the public reside or visit.

How does AFCNI deliver this service?

With a combined 35 years in the safety services sector, AFCNI is qualified and approved to test and supply emergency lighting.

- We employ trained specialist fire sector engineers;
- We ensure that our teams are always working to the latest standards
- Full range of emergency lighting and signs available
- All signs comply with 'Signs and Signals regulation'.
